Launching Alchemy Trades on custom Ports!
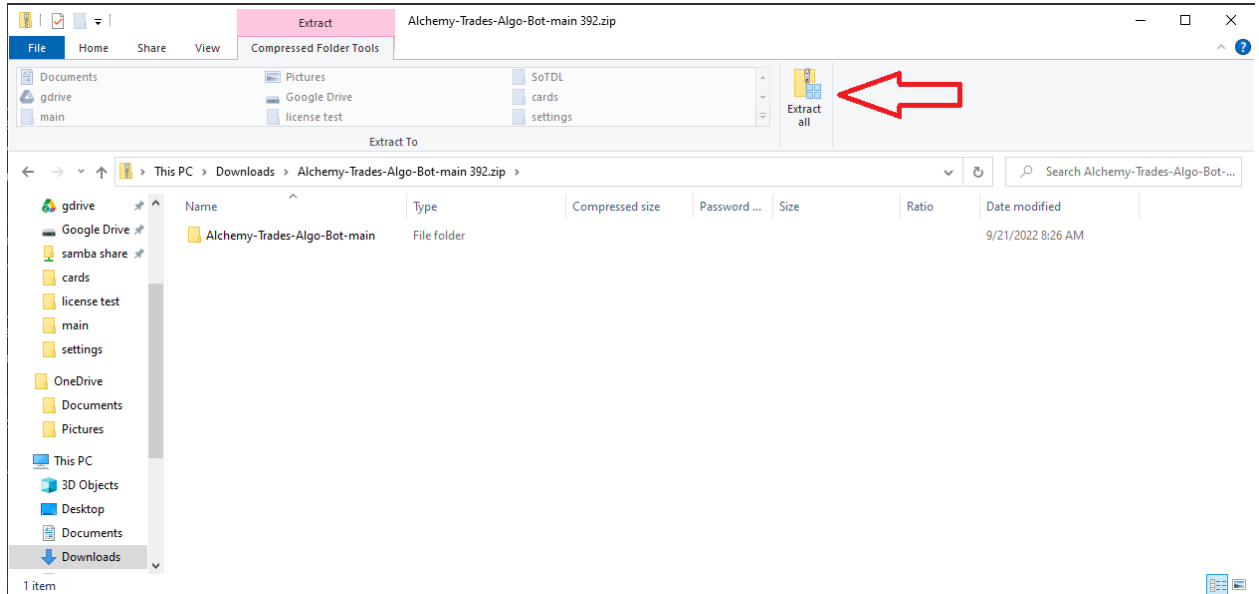

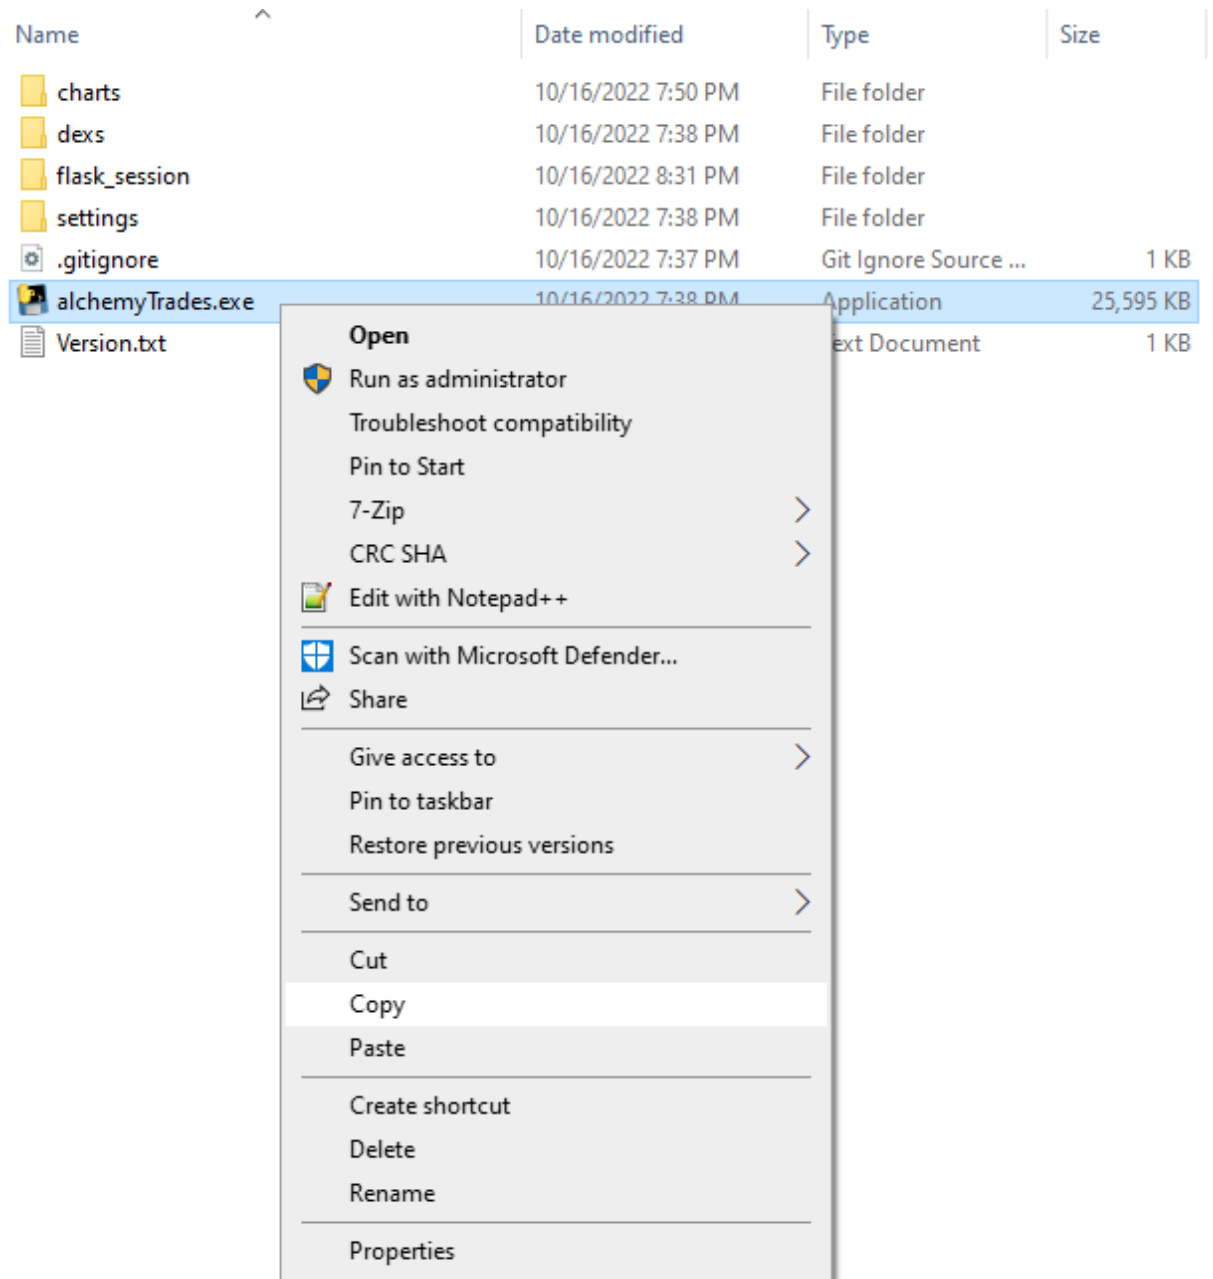

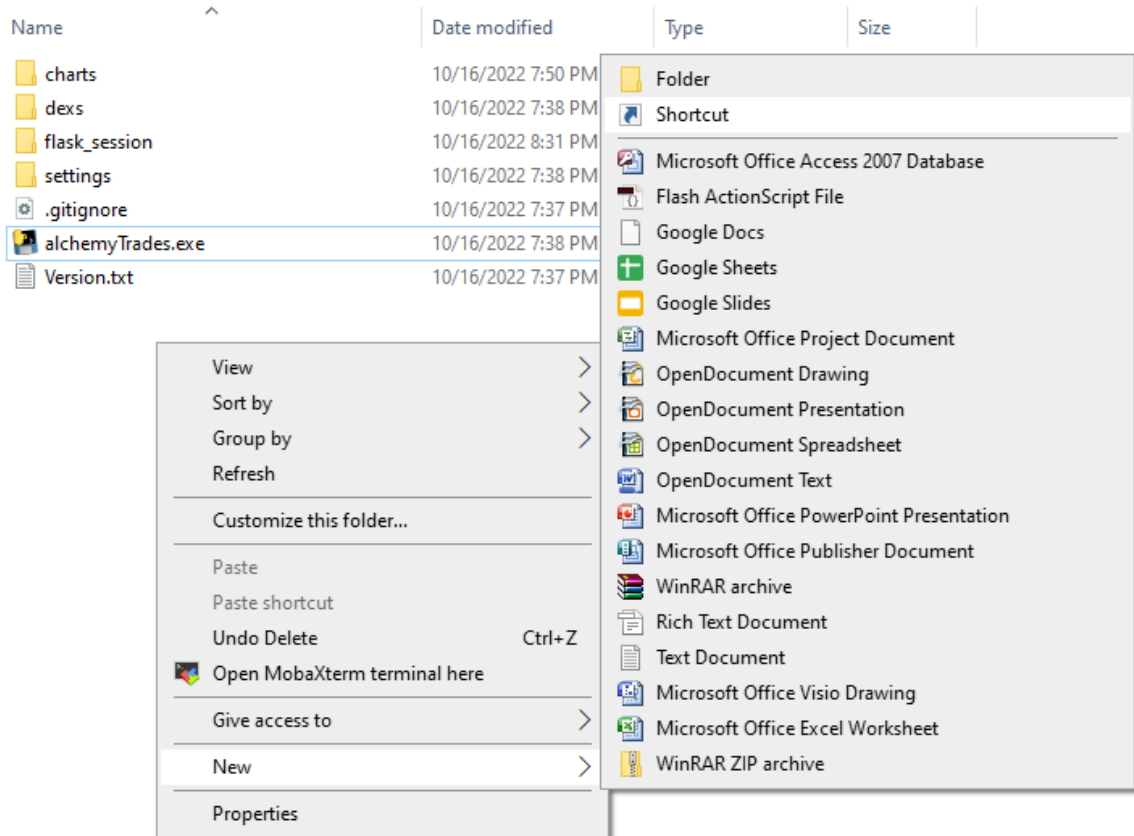

1. Download the newest version of AT
2. Unzip the download. If you see this extract all button in your folder, then its not yet unzipped.

3. Doubleclick the exe, this will build out the directories and it will open a browser tab on port 5000. You can skip this step if port 5000 is in use already.
4. Right click the Alchemy Trades exe file and select copy

Properties

5. Right click in the folder and select new, shortcut

6. Here you will need to paste in the copy of the exe that you made earlier. Please note that you cannot right click and paste, I don't know why Windows does things like this. Please use the keyboard shortcut Ctrl-V to paste it.

✕

← 🔲 Create Shortcut

What item would you like to create a shortcut for?

This wizard helps you to create shortcuts to local or network programs, files, folders, computers, or
Internet addresses.

Type the location of the item:

| Trades-Windows-beta\Alchemy-Trades-Windows-beta\alchemyTrades.exe" | Browse... |

Click Next to continue.

Next   Cancel

7. Hit next and save
8. Now, right click the shortcut you just made. It will have the same name as the exe, but
   you can see that the file type is shortcut. If you don't see that click on view in the top of
   the folder and select "Details". Select Properties on the shortcut.

alchemyTrades.exe

Target type: Application

Target location: Alchemy-Trades-Windows-beta

Target: `rades-Windows-beta\alchemyTrades.exe -p 4000`

Start in: `C:\Users\enduser\Downloads\Alchemy-Trades-W`

Shortcut key: None

Run: Normal window

Comment:

| Open File Location | Change Icon... | Advanced... |

10. Congrats, you can now create shortcuts for Alchemy Trades and run them on any port. This also means you can have many versions running.

Please remember, if you are going to have multiple instances of Alchemy Trades running, they all need to have their own folders. Create the shortcut with the port change in each of the folders.
